* NOTE: Our calories are given using the industry-standard Modified Atwater (i.e., Metabolizable Energy) equation, which assumes that pet food is 90% as digestible as human food. However, we believe that Evermore is a fully digestible food, and therefore feel that the Atwater calculation (i.e., gross calories, which is what the USDA uses to calculate human food calories) should be considered as well. These numbers are 1,457 kcal/kg., 661 kcal/lb., and 41 kcal/oz AS FED, and 5,171 kcal/kg., 2,345 kcal/lb., and 147 DRY MATTER.
