\* NOTE: Our calories are given using the industry-standard Modified Atwater (i.e., Metabolizable Energy) equation, which assumes that pet food is 90% as digestible as human food. However, we believe that Evermore is a fully digestible food, and therefore feel that the Atwater calculation (i.e., gross calories, which is what the USDA uses to calculate human food calories) should be considered as well. These numbers are 1,914 kcal/kg., 868 kcal/lb., and 54 kcal/oz AS FED, and 5,454 kcal/kg., 2,474 kcal/lb., and 155 DRY MATTER.
