\* NOTE: Our calories are given using the industry-standard Modified Atwater (i.e., Metabolizable Energy) equation, which assumes that pet food is 90% as digestible as human food. However, we believe that Evermore is a fully digestible food, and therefore feel that the Atwater calculation (i.e., gross calories, which is what the USDA uses to calculate human food calories) should be considered as well. These numbers are 1,670 kcal/kg., 757 kcal/lb., and 47 kcal/oz AS FED, and 5,207 kcal/kg., 2,362 kcal/lb., and 148 DRY MATTER.
